1. EXECUTIVE SUMMARY

The **Government Scheme Finder** is a civic technology platform engineered to streamline how Indian citizens discover and access government welfare schemes. Millions of eligible citizens remain deprived of vital economic assistance due to fragmented information across national and state ministry portals, intricate bureaucratic eligibility language, and a lack of unified digital screening tools.

2. LANDING INTERFACE & PLATFORM ARCHITECTURE

The platform provides a single-window citizen interface covering 20+ verified government schemes across 12 target categories with pan-India coverage.

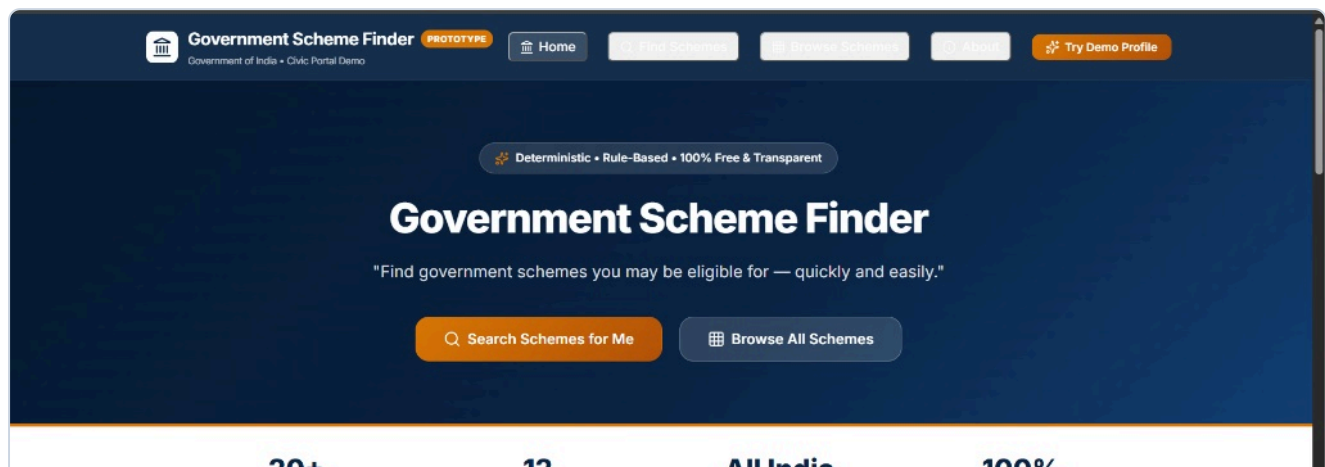

Figure 1: Government Scheme Finder - Landing Page & Main Portal Navigation

Deterministic Rule Engine Guarantee

"The application does not rely on generative AI, OpenAI API, Gemini API, or paid LLM services. It utilizes a deterministic rule-based matching model over a structured government scheme dataset, ensuring 100% predictable recommendations, zero hallucinations, fast local execution, and total transparency."

3. RULE-BASED RELEVANCE SCORING MODEL (100-POINT SCALE)

To ensure fair, accurate, and completely auditable results, the recommendation engine scores every scheme against the applicant's input parameters across six weighted dimensions:

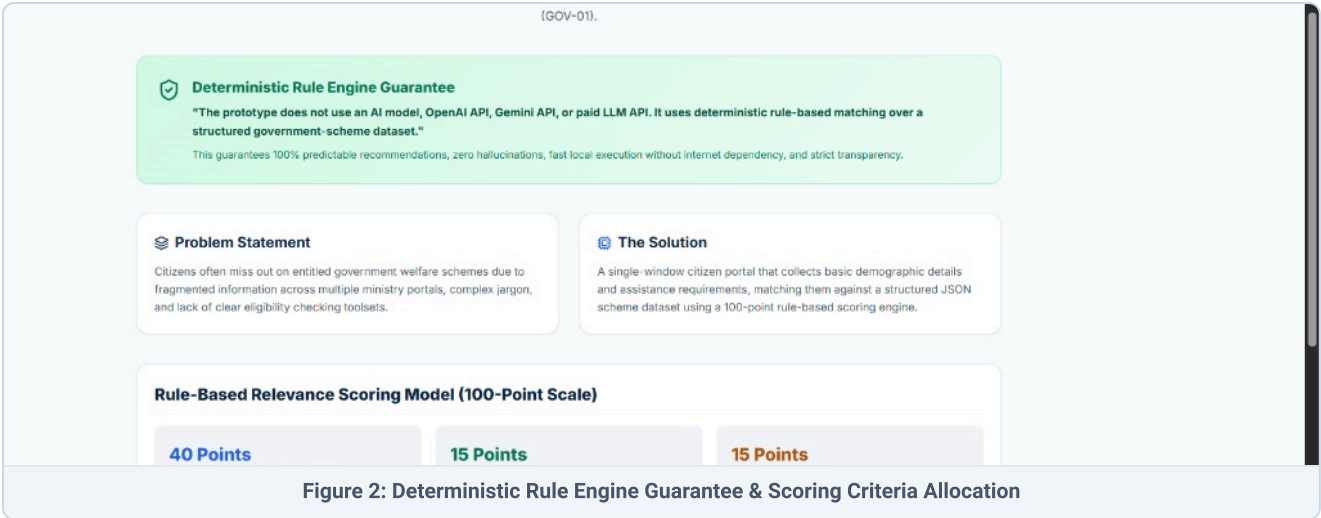

Figure 2: Deterministic Rule Engine Guarantee & Scoring Criteria Allocation

Scoring Criteria	Points Allocated	Evaluation Logic
Requirement & Category Match	40 Points	+30 pts for exact primary category match; +10 pts for keyword overlap in user prompt.
Age Eligibility	15 Points	Awarded if citizen's age falls strictly within `minAge` and `maxAge` parameters.
Income Ceiling	15 Points	Awarded if annual family income is within specified scheme ceiling limit.
State Availability	10 Points	Awarded for Pan-India coverage or exact state match (e.g., Uttar Pradesh, Tamil Nadu).
Occupation Match	10 Points	Awarded if primary occupation matches scheme target beneficiary (e.g., Farmer, Student).
Special Vulnerability Match	10 Points	Awarded when specific status flags (Disability, BPL, Senior Citizen) align with criteria.

4. CITIZEN PORTAL FORM & INPUT CAPTURE

The citizen portal form collects crucial demographic, financial, and requirement metrics needed by the rule engine to accurately determine eligibility:

The screenshot shows the 'CITIZEN PORTAL FORM' titled 'Find Schemes for Me'. It includes a header with 'Government Scheme Finder' and a 'Try Demo Profile' button. The form asks for basic details and features a 'Want a quick test with pre-filled details?' section with a 'Choose Demo Profile' link. The main section, '1. Personal & Financial Details', contains fields for Age (45), Gender (Male), Annual Family Income (₹) (150000), State/Territory (Uttar Pradesh), District (Varanasi), Area Type (Urban), Primary Occupation, and Social Category.

Figure 3.1: Citizen Demographics & Vulnerability Status Selection

This section, titled '3. What Type of Government Support Are You Looking For?', allows users to select their primary category requirement. It includes checkboxes for 'Student?', 'Senior Citizen (60+)?', 'Unemployed Job Seeker?', 'Farmer / Agri-Worker?' (checked), 'Disability (PwD)?', 'BPL / Low Income Card?', 'Widow / Single Mother?'. Below, the 'Select Primary Category Requirement' section shows buttons for Education, Scholarship, Agriculture (selected), Employment, Housing, Healthcare, Women & Child Welfare, and Pension.

Figure 3.2: Assistance Category Selection & Natural Text Prompt Description

5. SCHEME RECOMMENDATION & RESULTS DASHBOARD

After profile evaluation, schemes are categorized by eligibility tier (100% High Match vs Partial Match). Clear match scores and rule breakdown tags are rendered for the citizen.

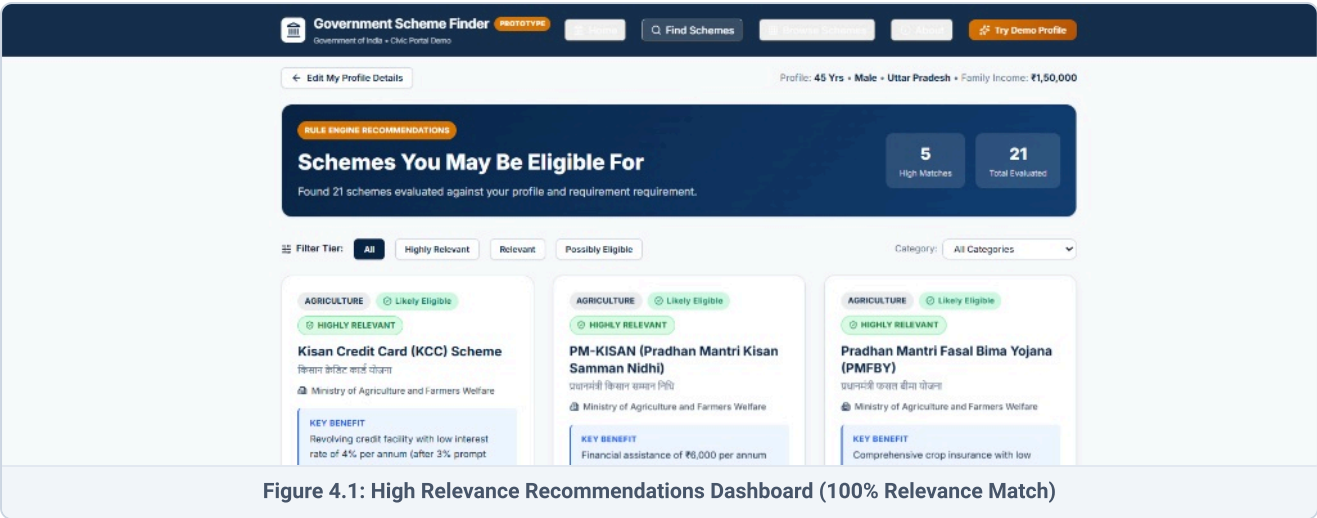

Figure 4.1: High Relevance Recommendations Dashboard (100% Relevance Match)

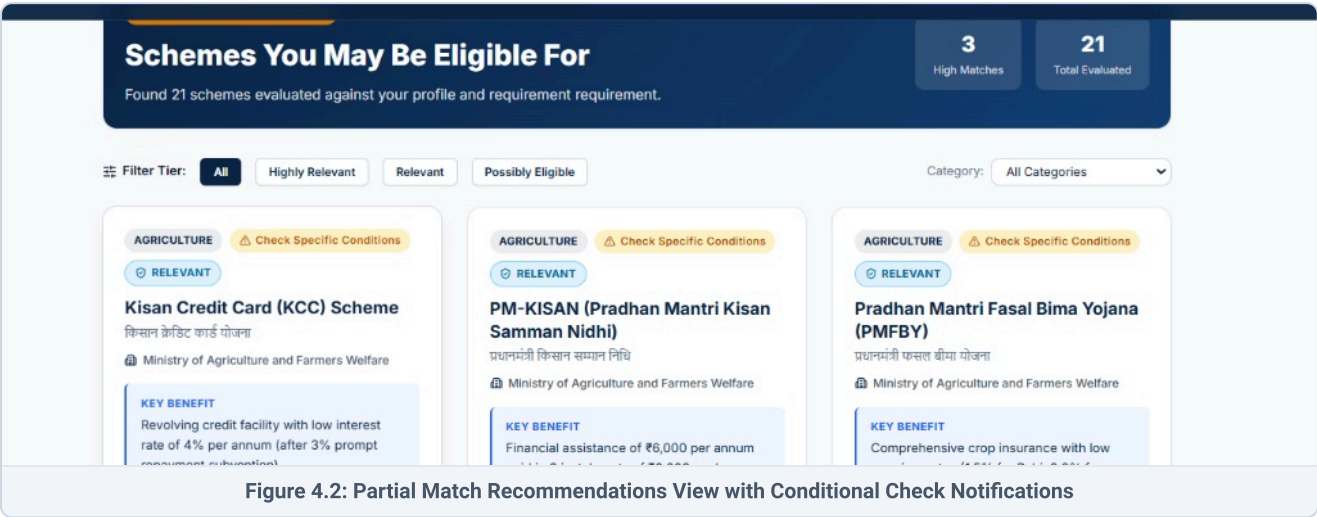

Figure 4.2: Partial Match Recommendations View with Conditional Check Notifications

6. SCHEME DETAILS & TRANSPARENT EXPLANATION

Selecting a scheme opens a dedicated view detailing why the scheme was recommended, key benefits, eligibility rules summary, required documentation, and step-by-step application instructions.

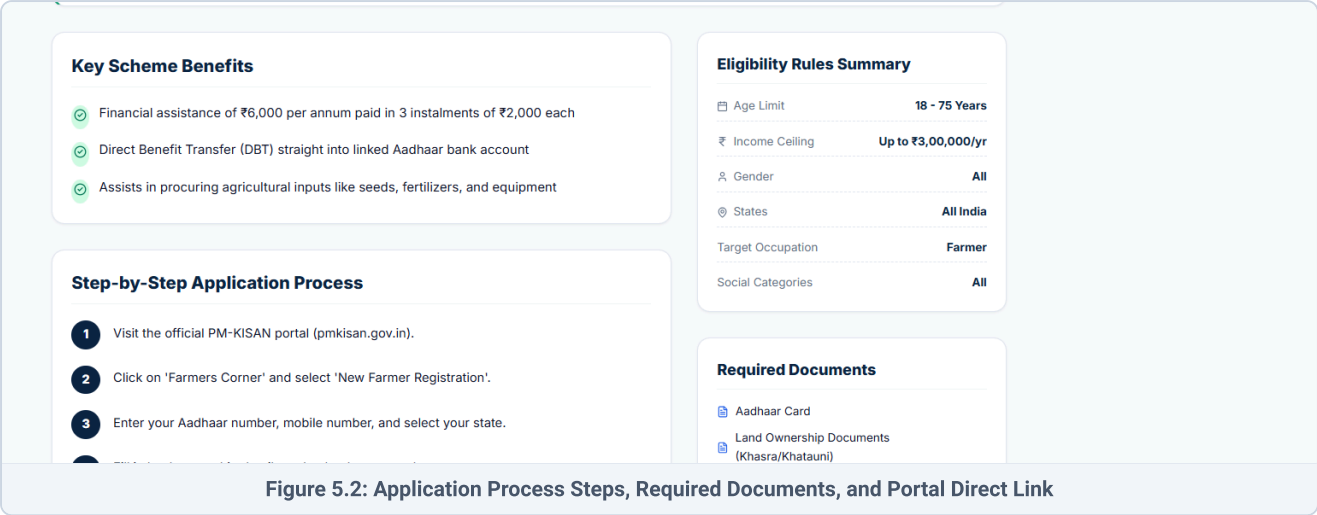

Figure 5.2: Application Process Steps, Required Documents, and Portal Direct Link

7. CONCLUSION & ROADMAP

Current Milestone Functional web prototype with 20+ schemes, 12 categories, 100% deterministic rule matching, and instant local response.	Future Roadmap Expanding dataset to 500+ schemes, regional language support (Hindi, Tamil, Telugu), and an offline PWA for rural users.
